BATM Advanced Communications Limited
("BATM" or "the Group")

BATM selected as partner in cybersecurity by FPT Israel

BATM (LSE: BVC; TASE: BVC), a global provider of advanced network infrastructure, cybersecurity and diagnostic technologies, is pleased to announce that it has been selected as a partner in cybersecurity by FPT Israel, which is a company of FPT Corporation (HOSE: FPT), a leading Vietnam-based technology group providing digital transformation services and solutions in over 30 countries.

On 13 January 2026, FPT Corporation officially announced the establishment of FPT Israel. At the event, FPT Israel introduced a portfolio of advanced technology partners in Israel – including BATM – aiming to expand its high-tech solutions ecosystem. This initiative represents delivery on BATM's strategy to bolster its capabilities and expand its cybersecurity activities through entering partnerships. It also forms part of FPT's strategy to identify, adopt and invest in core technologies – particularly advanced cybersecurity technologies – while advancing the establishment of FPT Israel as a global Innovation Hub, representing a strategic expansion of FPT's international presence and its efforts to master core and sovereign technologies, in alignment with Vietnam's science and technology development strategies, including Resolution No. 57-NQ/TW and Decision No. 1131/QĐ-TTg.

Moti Nagar, Chief Executive Officer of BATM, said: "This partnership represents an opportunity to expand the reach of BATM's quantum-resilient and post-quantum security technologies through a leading global technology group. FPT's scale, strong presence in Asia and focus on advanced digital infrastructure is well-aligned with BATM's long-term growth strategy for software-based cybersecurity solutions."

Tran Dang Hoa, Chairman of FPT IS, FPT Corporation, added: "Our new global Innovation Hub is designed to bridge Israel's worldclass disruptive technologies with the growing needs of Vietnam and FPT's global delivery network. With BATM, we aim to meet the growing demand from enterprises and regulated markets for future-proof security solutions that address emerging quantum threats."
