BATM Advanced Communications Limited
("BATM" or "the Group")**First Order for Tactical Encryption Platform**
New cybersecurity order worth c. \$1.6m

BATM (LSE: BVC; TASE: BVC), a global provider of advanced network infrastructure and cybersecurity technologies, is pleased to announce that it has received its first order, worth c. \$1.6m, for a tactical encryption platform.

This latest order follows the Group undertaking projects with its long-standing customer to develop next-generation cyber capabilities, including tactical encryption. The Group delivered a proof-of-concept of the platform during the first half of 2026, which has now transitioned to an initial supply order to be delivered in the current year. The platform, which is hardware based and quantum-era-ready, provides military-grade encryption and compliance with the highest security standards.

Moti Nagar, Chief Executive Officer of BATM, said: "We are delighted to have received this first order for our new tactical quantum-era-ready encryption platform, which is another example of how our development projects transition to supply agreements. This represents a significant expansion of our cybersecurity offer and entry into a new market as well as execution on our strategy to be able to offer customers a complete encryption solution to address all their requirements. It also reflects our dedication to providing ultra-high-technology solutions to protect mission-critical organisations and their networks. We look forward to delivering this initial order and receiving further contracts in due course."
