BATM Advanced Communications Limited
("BATM" or "the Group")

BATM wins additional $4.0m cybersecurity order

Significant further order for BATM's quantum-era-ready cybersecurity platform

BATM (LSE: BVC; TASE: BVC), a global provider of advanced network infrastructure and cybersecurity technologies, is pleased to announce that it has received an additional $4.0m order from its long-standing customer for the provision of further units of the Group's quantum-era-ready cybersecurity platform.

This order, which is to be delivered during 2027, is the latest expansion under the Group's existing agreement with the customer for this hardware-based solution. As noted in its announcement on 12 May 2025, as part of the collaboration with this customer, the Group is also developing the next generation of this platform, which will be ultra-high speed. This reflects the customer's confidence in BATM and their increasing requirement for the Group's leading cybersecurity products.

Moti Nagar, Chief Executive Officer of BATM, said: "We are delighted to have received this expansion order to deliver additional units of our quantum-era-ready cybersecurity platform to our long-standing customer. Alongside this, we are continuing to work with them to develop the next generation of this platform as well as other solutions, including a tactical cybersecurity platform. This further validates the strength of our solution, the value it brings to them and that they see it as part of their technology roadmap. As awareness of quantum threats accelerates, we are receiving growing interest in our ability to deliver post-quantum cybersecurity solutions from operators and other organisations seeking to protect themselves and their clients. We remain excited about our prospects for this rapidly developing market."
